

AMENDMENTS TO THE CLAIMS

1 1. (currently amended) An apparatus for controlling the
2 size of a blown extruded thermoplastic synthetic resin film tube
3 which comprises a calibrating basket through which the blown
4 extruded thermoplastic synthetic resin film tube passes and formed
5 with guide stirrups, each having a multiplicity of tube-contacting
6 film-guide rollers disposed along each of the stirrups and
7 supported on the respective stirrup with a respective roller
8 bearing , each roller bearing including roller bodies in a
9 respective cage and disks closing ends of he bearing.

1 2. (Currently amended) The apparatus defined in claim 1
2 wherein each of said roller bearings comprises an inner ring fixed
3 to the respective stirrup, and outer ring coaxial with the inner
4 ring and forming the respective roller, and an array of said roller
5 bodies between the inner and outer rings.

1 3. (Original) The apparatus defined in claim 2 wherein
2 said roller bodies are balls.

1 4. (Original) The apparatus defined in claim 2 wherein
2 at least one of said rings is composed of a synthetic resin.

1 5. (Original) The apparatus defined in claim 2 wherein
2 the outer surface of said outer ring has an antiadhesion coating
3 thereon.

1 6. (Original) The apparatus defined in claim 2 wherein
2 a gap is provided between neighboring rollers on each stirrup.
